## SALES OFFICE

Opatkowska 10b/15, 30-499 Cracow

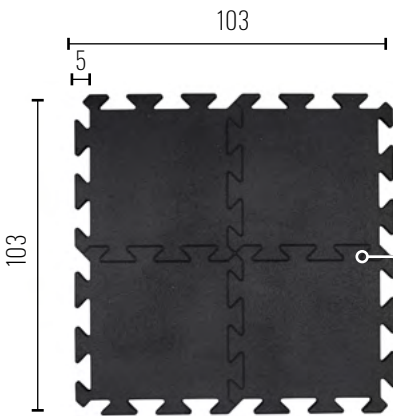

## High quality and durability.

Spotflex is rubber mats for owners of gyms, fitness and CrossFit rooms, personal trainers, and sports enthusiasts who have their home gyms. They are distinguished by the highest quality, as evidenced by the very high density of the rubber material and the durability tests we conduct on our products. In addition to modern design, they provide safety during exercise - they protect joints, cushion falls, and prevent injuries. Thanks to them, falling weights do not disturb the floor under the surface.

## Sportflex is available in two shapes.

**sportflex**  
PUZZLE

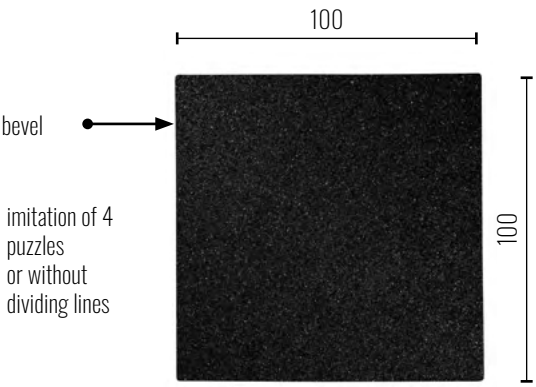

<b>puzzle</b> 103 x 103 cm	<b>thickness</b> 10 – 30 mm

## The main features of rubber plates:

dimensions of the plates  
about 100 x 100 cm

the thickness of the plates  
10-45 mm

frost resistant

anti-slip

high thermal resistance

high mechanical resistance

sound absorption capacity

sound absorption capacity

simple and quick installation

the homogeneous structure over the  
entire cross-section

does not collapse

# BE ECO!

Choose products from Polish manufacturer MTJ Group and protect our planet.

- We obtain rubber granules from recycled tires.
- The surface protects the floor, so more time will pass until the next renovation.
- High quality means less frequent disposal of used surface.

Sportflex rubber mats in the shape of a jigsaw puzzle protect the floor from scratches, protect exercisers from injury and add a modern look to the sports interior.

Each Sportflex product has been tested for safe use - it does not irritate the skin or cause abrasions. No negative impact on the environment has been demonstrated (and the rubber used to make the plates is recycled).

dimensions 103 cm x 103 cm	thickness 10, 15, 20, 25, 30 mm	stuff granules SBR from recycled
-------------------------------	------------------------------------	-------------------------------------

### Surface features:

- anti-slip
- floor protection
- fall absorption
- simple installation
- sound and vibration dampening
- easy to maintain
- resistant to abrasion
- won't stain hands or clothing
- recycled rubber

# EASY INSTALLATION WITHOUT GLUE

## SPORTFLEX BLACK

Allow yourself and your customers to enjoy the highest quality. Sportflex Black mats are exceptionally aesthetically pleasing, abrasion resistant, and yet exceptionally soft.

Sportflex PUZZLE Black are rubber surfaces from a Polish manufacturer for fitness and CrossFit gyms. They are scratch-resistant and come in five thicknesses - 10 mm, 15 mm, 20 mm, 25 mm, and 30 mm. The two thicker variants will professionally protect the floor from falling weights and take care of user comfort by dampening sound and vibration. The color of the plates is durable, not abrading or fading over many years.

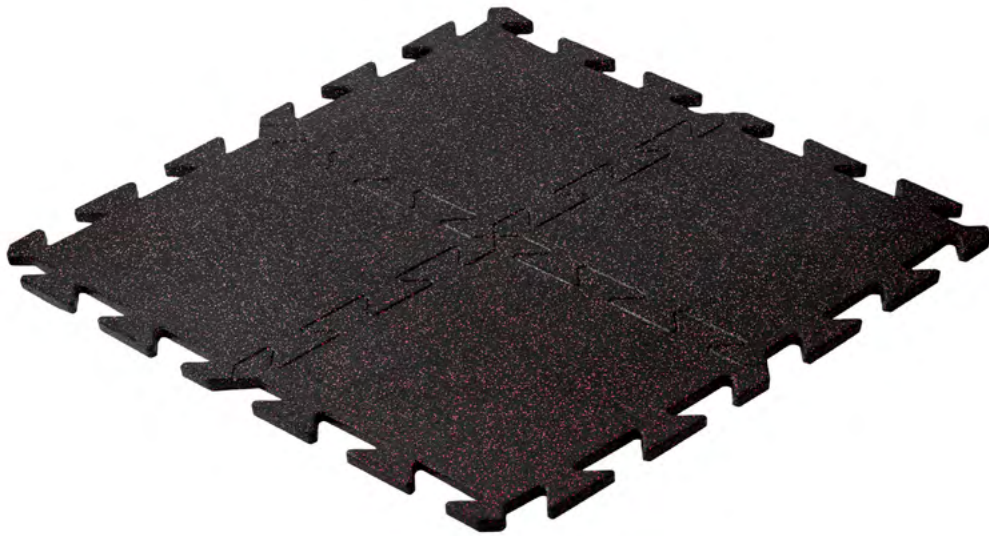

## SPORTFLEX SUPER BLACK

Puzzle Black with a super mosaic effect. This is the top shelf of aesthetics, convenience of use, and safety.

Mats with the addition of colored EPDM granules increase the attractiveness of the room and additionally help to mask the dirt accumulated during the day.

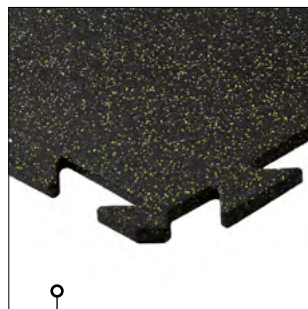

At the same time, they do not generate them themselves - they do not stain clothes, do not crumble, and do not stain.

- modern style
- high resistance to damage
- anti-slip and shock-absorbing for falls

## Colors of the plates.

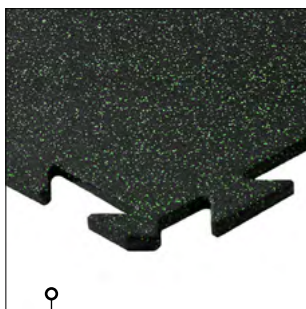

SPORTFLEX SUPER BLACK sports mats are available in black with granules in 5 colors - yellow, red, green, gray, and blue. The color of the mats is durable, and does not rub off or fade over many years.

RED

GREEN

GREY

BLUE

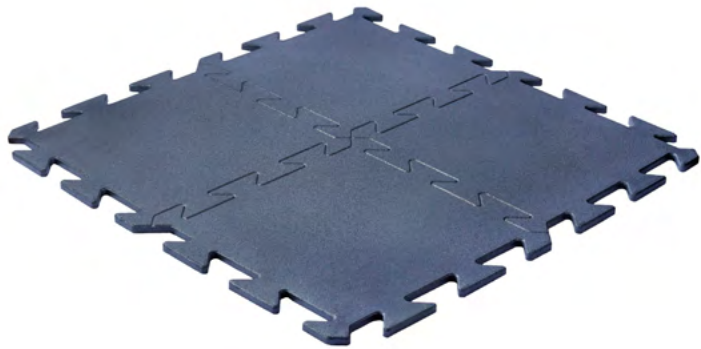

## SPORTFLEX COLOR

If you are looking for variety, this product is for you. Sportflex Color puzzles are mats that will transform your space with **color!**

Ensure the comfort of your exercises and the good mood of your customers.

- **visually attractive**
- **durable**
- **anti-slip**
- **scratch-resistant**

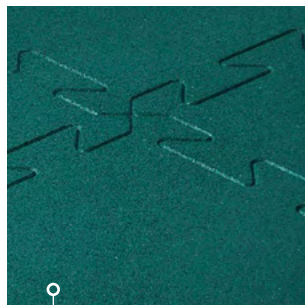

### Sportflex Color plates.

Sportflex Puzzle Color mats come in 3 color versions - red, green, and gray. The layers are durable and retain their intensity for a long time.

• RED

• GREEN

• GREY

## RUBBER ENDINGS

- Dimensions: 1000 x 160 x 15 mm or 1000 x 160 x 20 mm
- Composition: SBR granules and high-grade polyurethane adhesive
- Shape: 6-layer strip with a gentle slope
- Structure: uniform coating to ensure smooth entrances to the installed mats.
- Color: black, no color additions
- Installation: on a smooth surface, recommended to tighten the trim for increased adhesion

### Features:

- anti-slip
- high mechanical resistance
- sound absorption capacity
- self-cleaning properties

## How to put together a Sportflex puzzle? Like a puzzle!

We produce mats using molds to cut perfectly even shapes. Each puzzle is the same, so laying the surface is very easy. All you need to do is connect them. The whole thing is surrounded by Sportflex endings.

## The surface made of rubber plates is laid on a concrete foundation (on a self-levelling screed).

You can cover a floor of panels, tiles, and carpet with them provided that the surface is even, hard, and is a uniform layer. Otherwise, bulges may form.

### Even floor = even Sportflex surface

The plates have two sides - beveled and smooth.

The puzzles are laid with the beveled side up. Only this way of installation ensures the safety of exercise.

Durable square-shaped mats of 100 x 100 cm. They protect the floor from scratches, cushion falls, and protect against abrasions. Thanks to them, your clients will appreciate the high comfort of the gym, CrossFit, or fitness room.

dimensions 100 cm x 100 cm	thickness 10, 15, 20, 25, 30, 35, 40, 45 mm	stuff granules SBR from recycled
-------------------------------	--	-------------------------------------

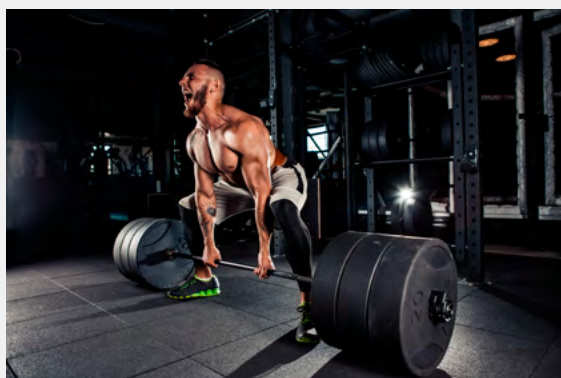

## Surface features:

- anti-slip
- flexible
- abrasion resistant
- ability to absorb sound
- high thermal resistance
- uniform structures in cross-section

Sportflex Square comes in 8 thickness.

10 – 30mm - recommended for **fitness rooms**, **gyms**, and **walkways**. They increase grip during exercise and protect the floor from scratches.

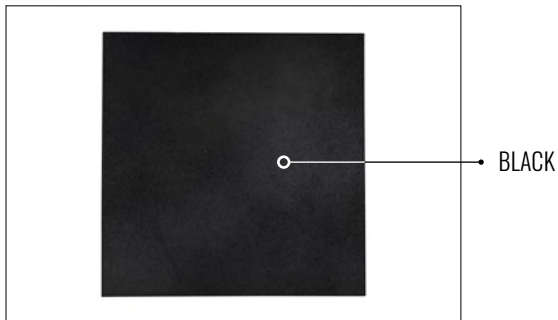

30 – 45mm - recommended for **gyms** and **platforms**. They cushion joints and extremely protect the floor from heavy weights.

# TRUST PROVEN SURFACES!

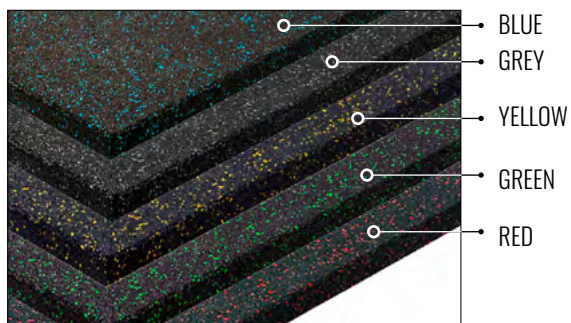

Choose from three versions of the product and enjoy high durability for years to come.

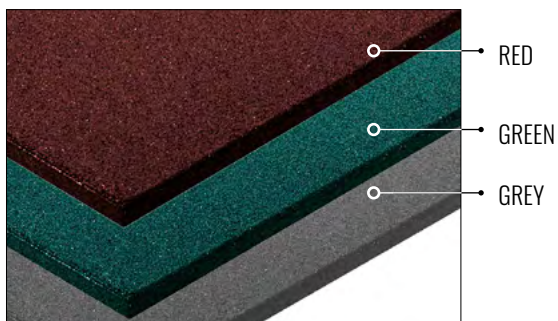

### Sportflex Square Black

The classic elegance of black, combined with high product performance. A surface for the most demanding customers.

### Sportflex Square Super Black

Black slabs with the addition of **colored granules**. Available colors: blue, gray, yellow, green, and red.

### Sportflex Square Color

Something for opponents of black surface - slabs in color. Available in red, green, and gray. **Intense color** that does not fade or rub off during exercise.

## How to lay the Sportflex Square surface?

### **Suitable substrate**

The rubber mat surface should be laid on a cleaned concrete foundation (self-leveling screed). Floors are also acceptable, provided they are level and hard.

### **Temperature**

Mats should not be laid at temperatures above 25°C and below 5°C.

### **Without using glue**

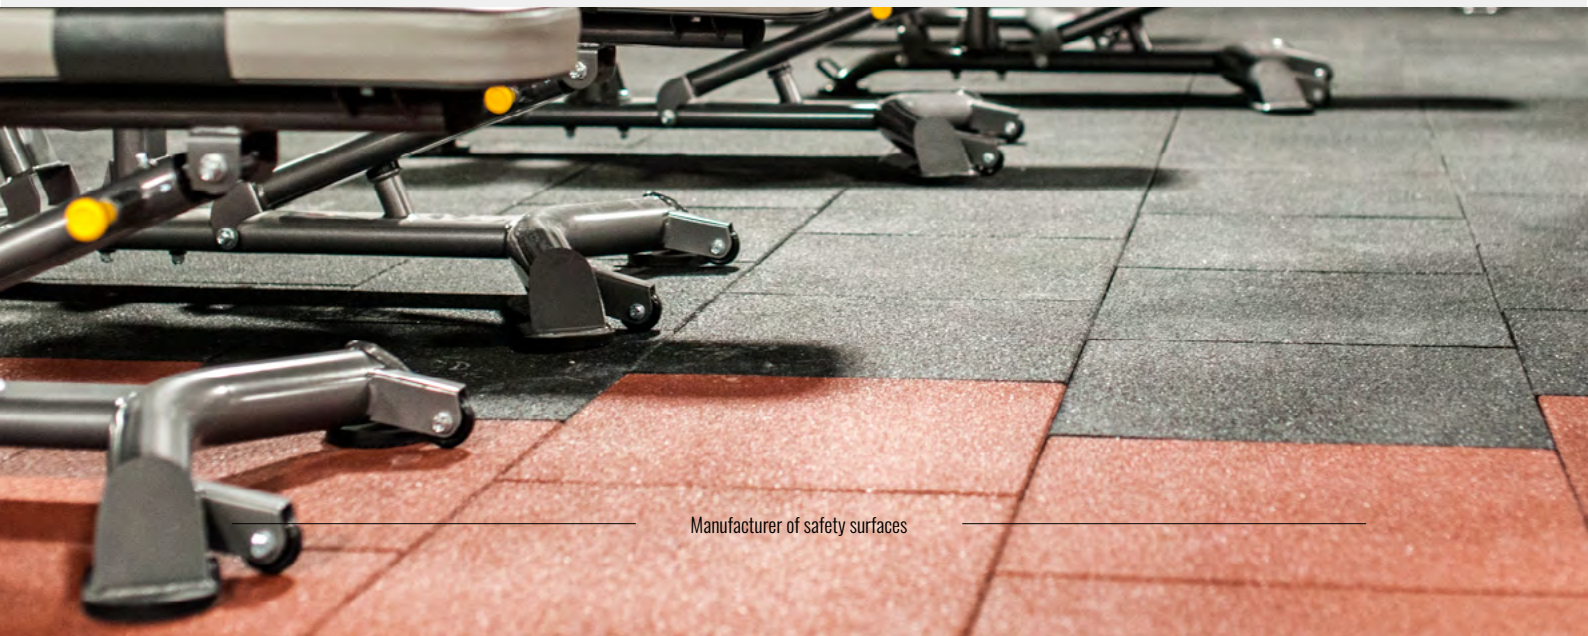

Lay the mats directly on the floor, in a contiguous arrangement (forming even columns and rows), or on a spacer.

### **It's simple**

Do not be discouraged by initial unevenness after laying - after a short time the whole structure will even out, thanks to the properties of the rubber granules.

### **Slab cutting**

Use a sharp knife to cut the mats, in order to lay them against the wall or in less accessible places.

## sportflex ROLL

Sportflex Roll is a mat made of rubber granules, so it has a cushioning function. It will work well in fitness rooms, gyms, sports halls, gymnastics rooms, as well as home gyms.

dimensions 100 cm or 125 cm	thickness 2,3,4,5,6,8,10,12 mm	density 1050, 950, 860 or 750 kg/m <sup>3</sup>
--------------------------------	-----------------------------------	--

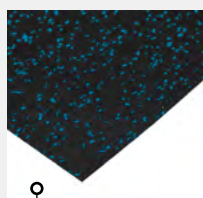

### Features of the mat:

- anti-slip
- floor protection
- cushioning of falls
- easy to maintain
- does not stain clothes

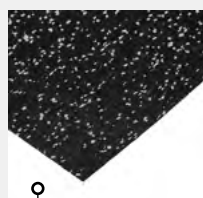

Sportflex Roll – **BLACK** comes only in black color.

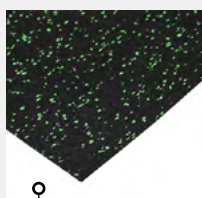

Sportflex Roll – **SUPER BLACK** are mats made of rubber granules with the addition of EPDM granules in blue, gray, green, red, and yellow.
